Hardware

Choosing and installing the right IT for your business lets you operate much more efficiently and productively. But finding your way through the huge choice of hardware can seem challenging. Whether you are buying a single PC for your home office or planning a storage solution for your organisation, the decisions about which hardware to choose and which supplier to go to will be very important.

Comcen's hardware division specialises in supplying a comprehensive range of hardware solutions from leading suppliers designed and configured according to the needs of your organisation allowing you to concentrate on your business.

Good advice, pricing, delivery and excellent service along with the ability to locate and supply almost any product, are some of the reasons why our customers keep coming back year after year.

Products and Solutions

We can supply

- PCs, Notebooks, Tablets
- PDA'S
- Servers
- Backup solutions
- Storage solutions
- Networking Solutions
- Whiteboards
- Projectors
- Peripherals - Printers, Scanners
- And much much more

On the desktop

Desktop computers come in a range of specifications, shapes, sizes and even colours! If you work primarily at your desk, need to use a larger higher-quality screen for easier viewing, do not need a computer to take to meetings, or use whilst on the road and if you need more computing power, then a desktop computer might be the answer for you. Let us help you choose the right computer from our portfolio of leading brand desktops.

Mobile solutions

Notebooks, tablets and PDA's give you the flexibility to work anywhere, anytime, on the train or plane, in airports and hotels, from home, in school or college, abroad and even in the office. Tell us what you want to use your mobile device for and we will get you the best value computer running the latest technology today, at a price you can afford.

The Interactive Boardroom or Classroom

From classroom to boardroom, you can turn your ideas into action with interactive whiteboards/tablets/slides and projectors.

Interactive solutions allow you to access a wide range of multi media applications, bringing your presentations and lectures to life.

You need to think about where you want to position your boards and projectors. Do you need mobility? What other equipment will be required to work with your new equipment? Do you need a secure installation? How should you look after your equipment?

We offer audio visual solutions from a wide range of manufacturers ensuring that you deliver the best presentations every time.

Peripherals - printers and scanners

Getting the right printing solution to cater for high volume jobs or making sure you portray your organisation professionally is not as easy as it seems. The printer may look good on paper but the ongoing costs could price it out of your budget. With vast experience of delivering print solutions, you can be sure that whatever we chose will fit the job and your budget, and we can even supply the consumables!

Likewise when choosing a scanner, do you need single sided, double sided, colour, black and white, A4, A3, or even a sheet feeder? How many pages do you want to scan a day? What software does it need to work with?

Servers

Comcen, as an accredited partner for all of the major IT manufacturers, can provide you with a range of powerful, affordable servers for your business. Whether you are buying a server for the first time or adding to your current infrastructure, all of the servers we offer are built ready to meet your current and future demands. You can choose your file server in pedestal, rack mount or blade configuration.

Storage

Need to consolidate data or servers? Comcen delivers a wide range of easy-to-install, high-capacity, storage products to meet your demanding business needs.

While one type of storage media may be sufficient for smaller companies, large enterprises will often have a mixed storage environment, implementing different mediums for specific departments, workgroups and remote offices.

Choose from:-

- Network Addressed Storage (NAS)
- Storage Area Network (SAN)
- iSCSI Storage Solution

Backup

No time to backup? Data, not hardware is the most valuable asset that an organisation possesses. Hardware can be replaced relatively simply and quickly, but if data becomes corrupt or completely lost then the likelihood of a organisations' survival is slim. From a single tape drive to a tape library or more comprehensive solution, we can advise you which is the most effective backup solution for your organisation.

Network Solutions

It is essential that your organisations' network is reliable, versatile and future-proof. From cabling to selecting the right network devices, Comcen will work with you to understand your network and business goals.

Replacement Planning

As the number of computers in your organisation increases so does the number that are over 3 years old.

Knowing when to let go.

There are many factors that affect the decision to retire older systems. Among them:-

- Warranties
- Having the right computer matched to your users needs
- Increasing help desk calls
- Performance of 'old operating systems'
- Replacement strategy. Three-year lifecycle for desktop PCs and two years for notebooks

Although you may be keeping your hardware longer, technology changes so rapidly it really does make sense to consider a 3 year and not a 5 year replacement plan.

Ask yourself... Will the motherboard still exist in 2 or 3 years time? Can you upgrade it? Think of the Frankenstein PC concept. Are you using one? - Taped and patched together, drivers that are in conflict with the operating system or hardware. It doesn't look very good and worse yet it doesn't run very well.

Then when you factor in security risks, high maintenance costs and reduced productivity, refreshing your aging PC base could actually save you time and money.

One thing is for certain the pace of technology just keeps getting faster, with Comcen as your technology partner you can be certain that we will be there with you helping to make the most effective use of technology today and into the future.

Hard To Find Products

Let us help you to source those hard to find products.
