

Benefits

- ◆ Increases enjoyment and motivation
- ◆ Teachers can remain at the front of class, while integrating ICT into their lessons
- ◆ Enables quieter or more withdrawn children to participate
- ◆ Versatility is the key. Interactive solutions can be used with all ages across all areas
- ◆ Increases access for younger children and students with disabilities, as no keyboards are required

Using audio visual equipment such as interactive whiteboards, tablets, pads and projectors will bring your lessons to life. Making learning, teaching and presenting more efficient, flexible and enjoyable.

Interactive Whiteboards

The interactive whiteboard adds an extra technological dimension to any learning environment, enabling groups to work together in a spontaneous and flexible manner.

An interactive whiteboard is a touch-sensitive projection screen that allows you to control a computer directly by touching the board rather than using a keyboard or mouse (although these can still be used).

Whiteboards allow you to access a wide range of multi media applications, bringing your presentations and lessons to life.

You need to think about where you want to position it. Do you need mobility? What other equipment will be required to work with your new equipment? Do you need a secure installation? How should you look after your equipment?

Comcen supplies a full range of interactive whiteboards varying in both size and capability from all the major manufacturers in the field.

Interactive Slates/Pads

If you need to move around the room whilst presenting or have people who are unable to come to the front of the room then an interactive slate is perfect.

At any time you can hand over the device to a student to solve a problem, or to write their answer on the board, which stimulates their enthusiasm and encourages greater participation in the lesson.

Interactive Tablets

Tablets are used for preparation of materials either at home or away from the room where your interactive whiteboard is. You can then simply connect your computer to your board when you are ready to teach.

Projectors

Projectors are a great way to enhance your teaching. Combined with an interactive whiteboard or tablet you're able to make your lessons more stimulating.

Voting Systems

If you need to promote group participation and feedback during discussion or debate scenarios, spontaneous opinion gathering, and more formal tests, you can use interactive voting systems which are hand-held keypads instead of pens and paper. This makes it more fun as the results are recorded instantly. The responses can even be anonymous allowing for greater involvement.

Installations

Our professional services team are experienced installers. They will make an initial visit to your premises to conduct a site survey, thus ensuring that your installation is quick and trouble free.

After consultation our professional services team will then install the equipment, if required.

Comcen appreciates the need for flexibility and therefore installations can be arranged at a time convenient to you i.e. after hours.

Testimonial

What our customers think of interactive whiteboards and us.

"...it was not just pupil friendly but teacher friendly as well ...the after sales provision and the training we had from Comcen was very good. We had a much better overall package from Comcen and we are still very pleased with it."

Comments from Mr. Keith Thomas, Headteacher, Pembrey School on behalf of Pembrey School PTA.
